

EXPERT 20

NATURAL VENTILATION

Expert 20 - Avantages

Outside temperature compensation • De-icing cycle • Minimum and maximum temperature recording • Minimum and maximum chimney curtain opening recording • Functions with potentiometer • Low or high temperature alarm (extreme temperature) • Curtain opening and closing at each 0,3 deg Farenheit • Temperature and maximum panel opening curves that can be programmed • Up to 4 temperature probes and an outside one with individual display • Compatible with computer • English and French display • More simple curtain and chimney calibration • Compensation in case of an excessive temperature difference between the different probes (recirculation)

EXPERT **20**
Natural ventilation

Automatic and independant controller for:

- 2 curtain stages
- 1 chimney stage
- 2 heating stages (also in zone mode)
- 1 stage for recirculator / heating / cooling system
