

# POLYTHERM

NATURAL VENTILATION

SINGLE  
POLYTHERM ▶

## A reliable, insulating and transparent system!

The most transparent insulating system on the market R1.6 (U3.5) • Offering 2 distinct ventilation stages • Automatic, simple and without pulley • Silent, economical and no maintenance • Single opening reaching 5 feet (1.5 meters) • Made of clear U.V. treated polyethylene • guaranteed 5 years • 2 51 watts blowers allow air under pressure between the 2 walls to obtain insulation • Oval shape to make raising and lowering easy • Standard size and format to make replacement easy

DOUBLE  
POLYTHERM ▶

### A large opening rigid system!

- Opening reaching 10 feet (3 meters)
- Offering 4 distinct ventilation stages for more precision
- More rigid and safe frame due to his solid permanent center
- Central support piece designed to provide rigidity without obstruction
- Higher stability of membranes when high winds occur to extend duration
- Possibility of replacing only 1 section if broken instead of entire wall
